RE: Letter of Notification
Albany Transmission Line Extension Project
Filed as Lee Extension 138 kV Transmission Line Project
Case No. 22-0752-EL-BLN

Dear Councilman Reynolds:

You are receiving this letter because we wanted to let you know about a proposed power line project in your area.

AEP Ohio representatives announced the Albany Transmission Line Extension Project in March 2021. The project involves building approximately 1 mile of 138-kilovolt (kV) transmission line and expanding a substation off Virginia Street in Albany, Ohio. The improvements provide an additional power source to strengthen the local electric power grid and reduce the likelihood of larger, sustained community power outages. Company officials expect construction to begin in the fall and conclude early 2023.

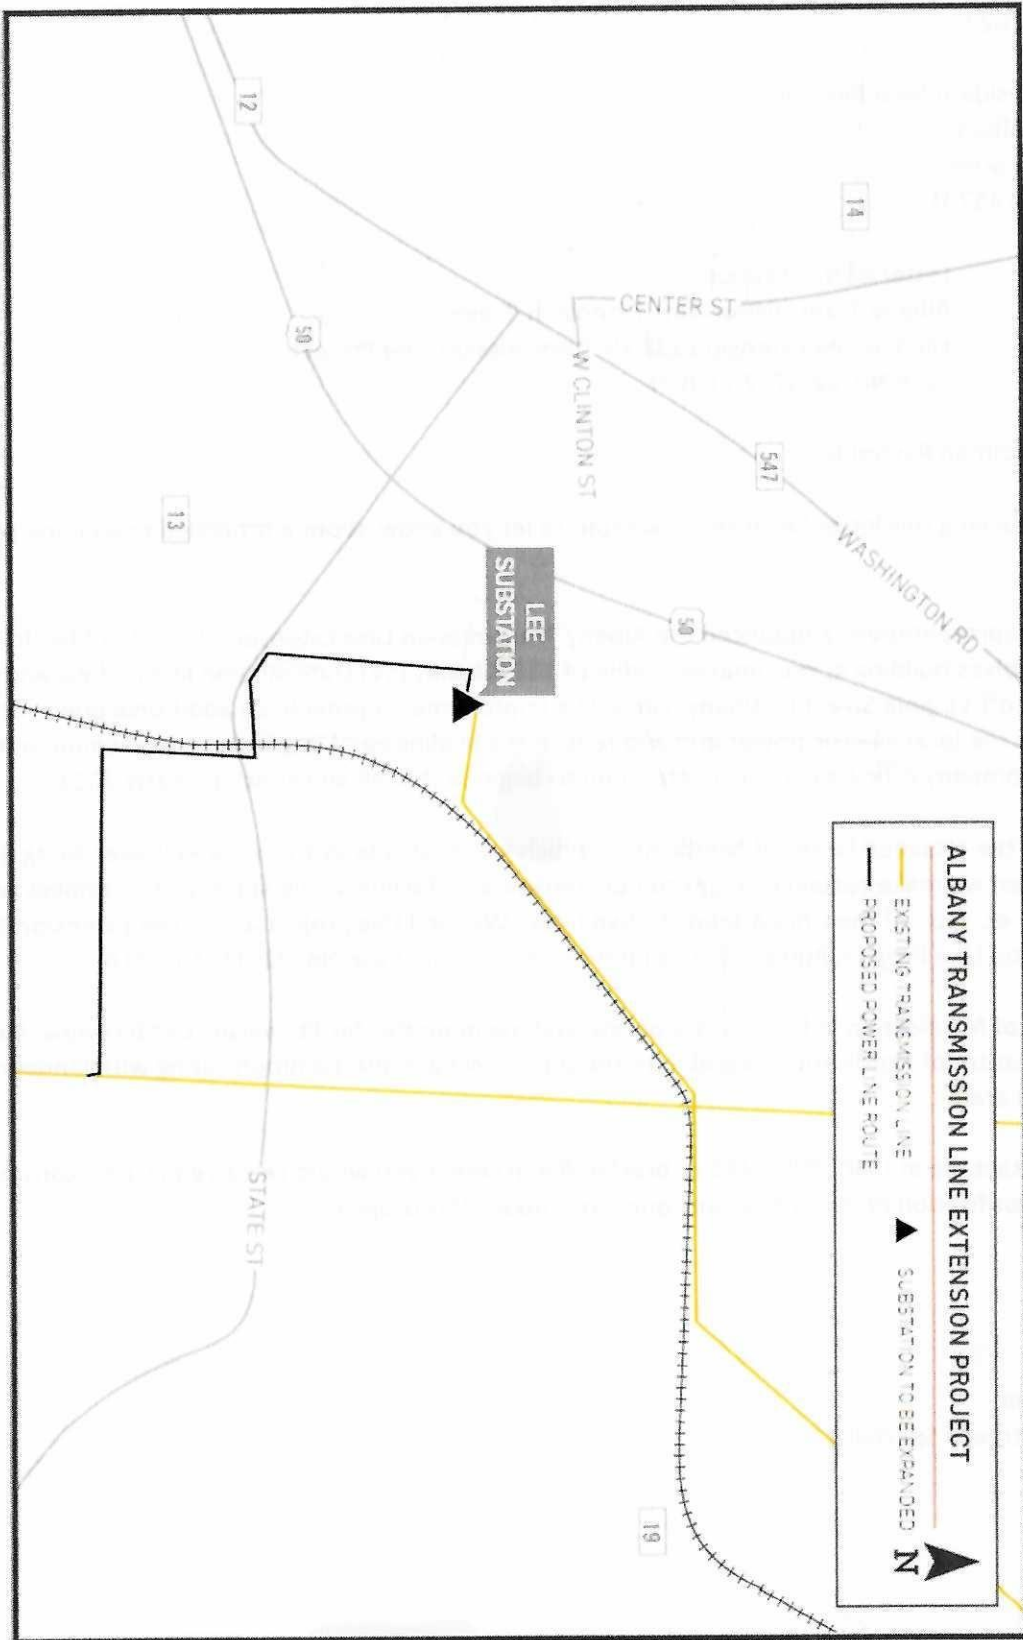

Please see the attached Letter of Notification, which we must submit to the Ohio Power Siting Board (OPSB) when we make certain changes to our transmission facilities. The submission complies with Rule 4906-6-01, et. seq., of the Ohio Administrative Code. We filed this project as the Lee Extension 138 kV Transmission Line Project, Public Utilities Commission of Ohio Case No. 22-0752-EL-BLN.

The Letter of Notification to construct, operate and maintain this facility awaits OPSB review. Please make this Letter of Notification available to the public. We are also communicating with landowners in the project area.

Please contact me at (380) 205-5381 or brecker@aep.com if you would like an electronic copy of the Letter of Notification or if you have any questions about this project.

Sincerely,

Brian Recker

ALBANY

TRANSMISSION LINE EXTENSION PROJECT

AEP Ohio officials plan power grid improvements for customers in southwest Athens County. The Albany Transmission Line Extension Project involves building about 1 mile of electric transmission line and expanding a substation.

WHAT

The project involves:

- Building approximately 1 mile of 138-kilovolt transmission line connecting the Lee Substation located off Virginia Street to an existing power line
- Expanding the Lee Substation

*This project requires Ohio Power Siting Board (OPSB) approval

WHY

One electric transmission line currently provides power to the village of Albany. The planned improvements provide an additional power source to strengthen the local electric power grid and reduce the likelihood of larger, sustained community power outages.

WHERE

The project area includes:

- Village of Albany
- Alexander and Lee townships in Athens County

PROJECT SCHEDULE

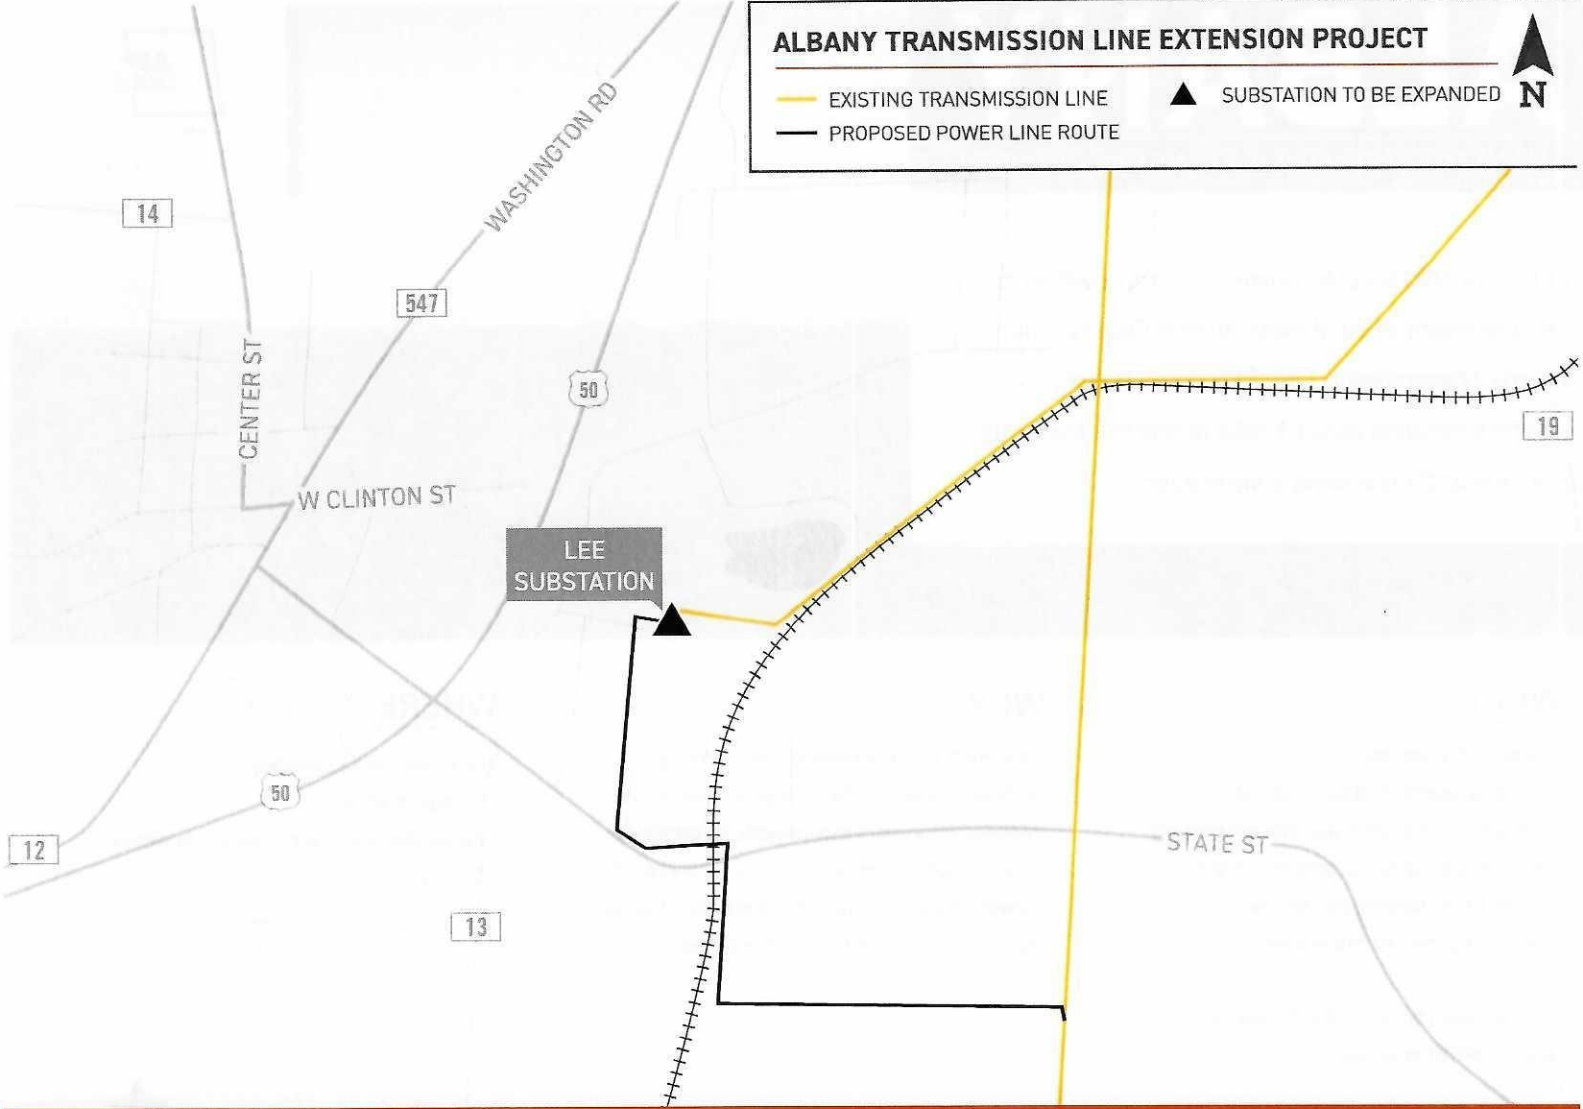

*Timeline subject to change **Ohio Power Siting Board

ALBANY TRANSMISSION LINE EXTENSION PROJECT

— EXISTING TRANSMISSION LINE
— PROPOSED POWER LINE ROUTE

▲ SUBSTATION TO BE EXPANDED

TYPICAL STRUCTURES

The project involves the use of single steel poles.

Structure Height: **Approximately 70-90 feet***

Right-of-Way Width: **Approximately 100 feet***

*Exact structure, height and right-of-way requirements may vary
